PROJECTS

Real Estate Finder *Full-Stack Real Estate Platform*

- Built a modern web application that allows users to browse property listings, message agents, and manage real estate listings
- Developed responsive and user-friendly interface with clean design and smooth navigation
- Deployed on Vercel for fast performance and accessibility
- Live Demo: https://realestatewebsite-omega.vercel.app
- Technologies: Next.js, TypeScript, Tailwind CSS (and others from my tech stack)
- Github: https://github.com/ifidonabraham/realestatewebsite

AI-Powered Web Applications

- Developing intelligent applications that integrate AI features using modern tools like LangChain.js and Vercel AI SDK

- Focused on practical AI use cases and agentic systems

Personal Portfolio & Technical Writing

- Designed and maintain a professional developer portfolio
- Write and publish articles on Artificial Intelligence, software development, and emerging technologies on Substack

EXPERIENCE & ACTIVITIES

Self-Taught Full-Stack Developer

- Independently learned modern web development and AI integration through consistent project building
- Progressed from YouTube tutorials to deploying production-ready applications using current industry tools

Technical Presenter

- Skilled presenter with the ability to explain complex technical topics clearly
- Proficient in Microsoft PowerPoint, Excel, and Notion for professional communication and project management

Career Objective Aspiring Software Developer seeking opportunities in AI-driven companies and startups. Passionate about building modern websites and AI-powered solutions for small businesses and real-world problems.
